Saskia Art Images Informational Sheet

For questions about this document, please contact CARLI at support@carli.illinois.edu.

CARLI Digital Collections website: http://collections.carli.illinois.edu

Saskia Art Images Collection homepage:
http://collections.carli.illinois.edu/cdm/landingpage/collection/saskia
> From this page, users may view a description of the Saskia collection and usage and rights information for images in the collection. Users may also choose from the pre-defined searches available. These searches have grouped together images that appear in specific textbooks. From the drop-down list in the middle of the page, users choose the textbook name and are taken to images from that specific textbook.

Browse the entire Saskia collection:
http://collections.carli.illinois.edu/cdm/search/collection/saskia
> The browse option allows users to view all the items in a collection without specifying any search criteria.

Search box and Advanced Search options:
> The Search box is available near the top of every page in CARLI Digital Collections.
>
> The Advanced Search option allows the user to limit search results by choosing specific criteria for which to search. Users may choose to search for specific keywords across all metadata fields or selected metadata field. If a user starts an Advanced Search from within the Saskia Art Images collection, future searches will be confined to the Saskia collection only.

Downloading high-resolution TIFF images
> A high-resolution TIFF version of each Saskia image is available. The TIFF can be downloaded directly from the metadata for any image. Users should scroll to the bottom of the page and find the link in the Full Resolution metadata field. Clicking on this link will initiate the display or download of the full resolution image. Images will be displayed in the browser, if that is configured, or downloaded to the computer location the user has set in his or her browser preference. Please note that the TIFF images are high-resolution, and, consequently, have very large file sizes. They may take several minutes each to download depending on your Internet connection.

Narrow your search by feature:
> When searching or browsing in CARLI Digital Collections, users can use the "Narrow your search by" feature found on the left hand side of the site to further facet the results.

Favorites

This is a cookie-based browser feature within CARLI Digital Collections for users to save favorite images for later. Click the "Save to favorites" link above the image with the star icon. Once selected as a Favorite, an image can be exported as a PowerPoint file for use with presentations.

Access to the Saskia Art Images Collection from on- and off-campus locations

On-campus access to the Saskia images is available at CARLI governing member libraries.

Off-campus access for viewing Saskia images requires IP authentication to verify CARLI affiliation; connections that are not authenticated will be limited to viewing the thumbnail images only.

Off-campus access without IP authentication is available to users at I-Share libraries using a valid library barcode.

Off-campus access for CARLI governing libraries that are not I-Share libraries can be established though the institution's proxy server.

For questions or problems accessing the Saskia collection, please contact CARLI Support at support@carli.illinois.edu

Purchase the Saskia collection for your library

For a small fee, CARLI governing member libraries have the option of purchasing the Saskia collection of 30,000 images and accompanying metadata to be loaded onto their own servers. For more information and pricing, contact the CARLI Office at support@carli.illinois.edu.
