

CARLI

ALMA HOW-TO: ALMA ANONYMIZATION,
REPORTING, AND PII

June 10, 2024

Agenda

- Overview of Alma Anonymization
- Resources and Best Practices for Handling Patron Information/Personally Identifiable Information (PII)
- Case Study—Lewis & Clark Community College
 - Student Library Usage without Analytics
- Analytics with PII before anonymization
 - Sample reports
 - Minimizing exposure

Alma Anonymization Implementation

- CARLI staff and the CARLI Resource Sharing Committee have tested and decided upon several [consortial policies for I-Share](#) that optimize the privacy of patron data while balancing the needs of library staff to access these data.
 - These configurations have been approved by the CARLI Governance Board.
- CARLI will enable Alma's anonymization of user data feature for all I-Share libraries on July 29, 2024.

Overview of Alma Anonymization

- Anonymization in Alma removes personal user information from fulfillment transactions (loans, fines/fees, requests) after that information is no longer required for a current transaction and is considered “complete” in the system.
- Anonymization in Alma leaves non-patron-identifiable information such as user group and affiliated I-Share institution reportable through Alma Analytics.

What is Personally Identifiable Information (PII)?

According to [National Institute of Standards and Technology \(NIST\)](#):

- Any representation of information that permits the identity of an individual to whom the information applies to be reasonably inferred by either direct or indirect means.
- Any information about an individual maintained by an agency, including (1) any information that can be used to distinguish or trace an individual's identity, such as name, social security number, date and place of birth, mother's maiden name, or biometric records; and (2) any other information that is linked or linkable to an individual, such as medical, educational, financial, and employment information.
- Information that can be used to distinguish or trace an individual's identity, either alone or when combined with other information that is linked or linkable to a specific individual.

PII Considerations

- PII is not any single category of information or part of a specific technology.
- Information that may be considered PII in some contexts may also be available in public sources like directories.
- Non-PII data may become PII when combined with other data.
- Some PII data are more sensitive than others.
- Handling PII requires a context-specific assessment of risk.
- Consider carefully if you really need to collect PII.
 - If you do, minimize access to it and regularly dispose of it when no longer needed.
- There are international, national, state, and local privacy regulations that govern the collection, retention, and use of PII.

CARLI Privacy Policy

CARLI takes the collection of personally identifiable information required to provide library services very seriously. It is our policy to store personal information in our systems for the shortest amount of time necessary to complete transactions or provide service. Access to personal information is restricted to the library and consortium staff needing such access to conduct library business. Personal information is never made available for commercial purposes and will not be revealed to any third party except by such process, order, or subpoena as authorized by law.

Approved by the CARLI Board of Directors, March 10, 2017

Professional Best Practices

From [Data Lifecycles](#), part of the [Privacy Field Guides for Libraries](#):

- Only collect data that has a specific operational need.
- Keep user data secure and limit staff access to only the data they need to perform specific tasks.
- Retain records in compliance with legal and operational considerations, and dispose of data in a timely manner when data are no longer required.
- Library consortia "should have retention policies and procedures for its member libraries to ensure the same level of user privacy throughout the consortium."

[ALA Code of Ethics](#):

"3. We protect each library user's right to privacy and confidentiality with respect to information sought or received and resources consulted, borrowed, acquired or transmitted."

Dennis Krieb
Director – Reid Memorial Library

ALMA Analytics

Homegrown

SARS/Blackboard Analytics

No bibliographic data is captured when tracking circulation data in SARS/Blackboard – only that a patron checked-out an item(s). It is completely “firewalled” from Alma to protect patron privacy. Frequencies are not collected either.

Distinct Student Count ~ by Returned Next Year.Returned Indicator and SSC Location

SSC Location	Distinct Student Count ~			
	Returned		Did Not Return	
Library Circulation	59.1%	501	40.9%	346

Lewis & Clark Community College

Analytics, Anonymization, PII Exposure

- Anonymization schedule
- Minimize PII data used when collecting and reporting
 - Sample Report: Patron with Loans 3 Days Previous
 - Sample Report: Patron Last Activity Date
 - Reports may be found at:
Shared Folders > Community > Reports > Consortia > CARLI > Shared Reports

Patron with Loans 3 Days Previous

- Lists patrons who borrowed items three days previous
 - Requires the Fulfillment subject area
 - Use data from the Patron Details at Time of Loan dimension
- May be useful for:
 - Adding context to circ activity
 - Measuring interactions and effects on student performance

Patron with Loans 3 Days Previous

Filters for Patron with Loans 3 Days Previous

- Patron Id (internal Alma user ID) is “-1” if anonymized
- TIMESTAMPADD function calculates dates by a given value and a reference date
- Could use Return Date instead of Loan Date

▲ Filters

└ Patron Id is not equal to / is not in -1

AND └ "Loan Date"."Loan Date" = TIMESTAMPADD(SQL_TSI_DAY, -3, CURRENT_DATE)

Patron Loans 3 Days Previous

Sample results for Patron Loans 3 Days Previous

- Actual results will show Patron Id
- Could use User Primary Identifier

Patron Id*	Patron Group	Patron Statistical Category 1	Patron Statistical Category 2	Loan Date	Loans (Not In House)
*****	Under Graduate Student	Business & Entrepreneur	Sophomore	6/4/2024	1
*****	Under Graduate Student	Cinema & Television Arts	Sophomore	6/4/2024	2
*****	Under Graduate Student	Theatre	Sophomore	6/4/2024	1

Patron Last Activity Date

- List patrons by primary identifier and include Last Activity Date
 - Requires only the Users subject area
 - Last Activity Date – last occurrence of a loan, return, or request
- May be useful for:
 - Adding context to circ activity
 - Measuring interactions and effects on student performance

Patron Latest Activity Date

Filters for Patron Last Activity Date

- Limiting by user group exposes less of the overall set of data

▲ **Filters**

- ▼ Status is equal to / is in Active
- AND ▼ User Record Type is not equal to / is not in Contact
- AND ▼ User Group is equal to / is in UNDERGRAD
- AND ▼ Last Activity Date is greater than or equal to 07/01/2023

Patron Last Activity Date

Sample results for Patron Last Activity Date

- Actual results will show Primary Identifier

Patron Last Activity Date			
Primary Identifier*	User Group	Expiry Date	Last Activity Date
****	UNDERGRAD	6/30/2030	5/28/2024
*****	UNDERGRAD	12/31/2014	8/30/2023
*****	UNDERGRAD	12/31/2016	11/9/2023
*****	UNDERGRAD	5/10/2017	5/22/2024
*****	UNDERGRAD	5/14/2020	7/3/2023
*****	UNDERGRAD	5/14/2021	7/24/2023
*****	UNDERGRAD	5/14/2021	1/25/2024
*****	UNDERGRAD	5/14/2024	9/12/2023
*****	UNDERGRAD	5/14/2024	9/14/2023

Daily FTP Reports

- Standard reports scripted for delivery to files.carli.illinois.edu
 - Lost Items Found Yesterday
 - PIDs for users with loans or fines at other I-Share libraries
 - User loan counts at other I-Share libraries
 - Users with fines at other I-Share libraries
- See [What's in My Library's FTP directory?](#)

Further Risk Reduction

- Minimize exposure to user-specific data
 - Consider which roles staff members need
 - New user roles for analytics
 - Designs Analytics – Fulfillment
 - Consider analytics objects instead of providing design roles

Q & A
